Modification of the Ignition Key Switch with bullet connectors for the killswitch

Modify the Key Switch according to the description below:

Disconnect the bullet connector on the black wire with red stripe (the connector that is closest to the ignition switch).

NOTE! A side mounted remote control will have to be opened to access the integral ignition switch.

Check that the manual lanyard switch is working normally after this modification is performed. Isolate the disconnected male bullet connector with electrical tape!

Modification of the Ignition Key Switch with Deutsch connector for the killswitch

Modify the Key Switch according to the description below:

Separate the Deutsch Connector circled in red (the connector that comes off the Key Switch).

Check that the manual lanyard switch is working normally after this modification is performed.
